

JAMUNA R

Contact No. +91 9379669393 | Email ID: jamuna.ravi096@gmail.com | LinkedIn: jamunar.linkedin.com

A Computer Science fresher seeking an entry-level opportunity to apply technical skills and gain real-world experience. Passionate about learning and contributing to efficient software solutions.

INTERNSHIPS

Mind Matrix - (Feb 2026 - May 2026) | Remote Bengaluru
Internship in Android App Development using Generative AI
Developing Android applications integrating Generative AI features such as AI-driven chat, content generation, and smart recommendations

Instawork - (Mar 2026 - May 2026) | Remote Bengaluru
QA Clipper Intern
Performed content quality analysis by reviewing videos against defined QA guidelines, ensuring accuracy, consistency, and adherence to quality standards while improving output based on feedback.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, CSS.

Testing Skills: SDLC, STLC.

AI/ML Exposure: Basic Machine Learning Workflow, Data Pre-processing, Basic Generative AI Usage, Text and image annotation, Model Prediction & Basic Streamlit Deployment

Packages & Operating Environment familiarity: Windows, Linux, MacOS

Tools & Technologies: Vscode, Jupyter Notebook, Google Collab, Eclips, Android Studio, Microsoft Excel.

PROJECT

AI Chatbot for Food Delivery System

Developed an AI-based chatbot to automate the food ordering process and manage customer queries efficiently. The system reduced manual customer support by providing real-time responses and improved overall user experience in food delivery operations.

Pest and Disease Detection using Real-Time Image Classification

Built a machine learning model to detect crop pests and plant diseases using real-time image classification techniques. Image preprocessing was performed using OpenCV, and a Convolutional Neural Network (CNN) was trained to accurately classify and identify affected crops, supporting early detection in agriculture.

Jal-Sanchay Tracker (Android App Development using Generative AI)

Developed a GenAI-powered Android application to help farmers and households track rainwater harvesting efficiently. The app integrates real-time location-based weather detection using OpenWeatherMap API, an intuitive rainfall picker with smart AI suggestions, and Room Database for offline data persistence, providing a seamless water conservation tracking experience accessible to non-technical users.

EDUCATION

Sri Krishna Institute of Technology	Bengaluru
Bachelor of Engineering	2023-2026
Computer Science and Engineering	7.5 CGPA

MEI Polytechnic	Bengaluru
Diploma	2017-2022
Computer Science	60%

BNR Public School	Bengaluru
SSLC	2016-2017
State Board	65.28%
